ABOUT US

Balfakih for security solution is member of Balfakih trading companies specialist for provide surveillance solution since 1995 .

BSS provides End-to-End Services that drive value and mitigate risk through technology solutions and professional services. Building on a strong reputation for service for over 15 years, BSS provides engineering excellence, world class service, and security expertise to premier regional, national and global organizations.

BSS has organized every employee in the company around the client. From account executives to project managers to engineers, our staff is focused on surpassing our clients' expectations and facing every job with the professionalism and attention to detail necessary for success.

Every project is guided through a series of disciplines, including business consulting, development and design engineering, site implementation and project management, and customer service. By looking at each and every project through the lens of these disciplines, we make certain that we cover every angle and address every issue so you continue to trust us as your independent security advisor.

Through our experience and our 15-year client base, we have developed unique perspectives on security in a multitude of industries that have created best practices in design and implementation. We work with you to provide a scalable solution and long-term security systems strategy that aligns with critical security requirements, budgeting concerns, and the available resources within your organization.

The greatest compliment that we can receive from a customer is to become their trusted security advisor. At BSS, we practice continual process improvement and seek opportunities for efficiency that help us better meet our clients' needs.
